Bringing people and houses together

LA GRANGE Big on impact, big on space, the La Grange is destined to be a best seller. It's an instant eye catcher with a striking façade and a contemporary modern design.

The light, spacious ambience is further enhanced by 31 course ceilings and free flowing, seamlessly integrated entertaining areas. A covered, paved alfresco and generous back yard area lends itself to hours of relaxation and social interaction with friends and family.

The kitchen is a vantage point over the family area, and with a traffic friendly floor plan, the home theatre's rear location ensures minimal interruption. European appliances and stainless steel finishes add more than just polish to this chef's delight, and ample storage space ensures clean lines and a minimalistic but avant-garde appearance.

The bedrooms are all surprisingly large for a home in this category, and a home office, which is isolated from the rest of the house provides a private retreat for business and study.

All in all, this home is a remarkable example of a home which surpasses expectations in a first homebuyer's category.
